

Mohan krishna Narra

18-11-2003 | Github | LinkedIn | n.mohankrishna2002@gmail.com | +91 9059053838

Profile

Entry-level Software Engineer skilled in Python, Java, JavaScript, with experience in Django, React, Angular, and Spring Boot. Proficient in REST APIs, cloud-native microservices, and databases including MySQL, MongoDB, Redis. Hands-on with AWS, Docker, Git, CI/CD pipelines, with project experience in AI/ML and data-driven platforms. Focused on delivering secure, scalable, innovative software solutions with strong problem-solving and clean coding practices.

Education

Prakasam Engineering College , B. Tech in Computer Science	Dec 2021 - April 2025
• Completed Bachelor of Technology with a 7.44 CGPA .	
Sri Chaitanya Junior College , PCM, 88.8%	July 2019 - Mar 2021
Smt. Godavaridevi Saraf High School , CBSE, 84%	June 2018 - Feb 2019

Internships

Full Stack Developer Intern <i>TLF Talentforge</i>	Mar 2025 – Present
- Developed scalable apps with React, Django, MongoDB, boosting performance by 40%. - Managed cloud deployments on AWS S3, Lambda, EC2 to improve scalability and reliability. - Mentored juniors and enforced Git workflows for clean, collaborative code. - Optimized data handling and caching workflows using Redis, MongoDB, Django, and Python to ensure high throughput and seamless application performance. - Used Docker for containerization, Pytest for automated testing, and LangChain for AI-driven workflows.	
Software Developer Intern <i>Rjay Technologies</i>	Mar – Aug 2025
- Developed backend modules using Spring Boot Java, building REST APIs for core business functions. - Designed and developed the I-Exam Platform, a full-stack web application using Spring Boot and React. - Built and integrated secure REST APIs with a SQL database, and deployed the platform on AWS EC2 with storage managed on AWS S3. - Enhanced UI/UX components, improving usability and user satisfaction through design thinking methods. - Automated testing with Selenium, integrated CI/CD pipelines in Jenkins, reducing release time by 20%. Project Link : https://iexam.org/	

Technical Skills

Languages: Python, Java, JavaScript, SQL, C, HTML5

Frameworks & Libraries: Django, React, Angular, Spring Boot, REST Framework, LangChain, Flask, FastAPI

Computer Science Fundamentals: Data Structures, Algorithms, Operating Systems, Object-Oriented Programming

Cloud & DevOps: AWS, Docker, Git, GitHub

Databases & Testing: MongoDB, MySQL, Redis, Selenium, Pytest

Projects

Privilege Escalation Attack Detection and Mitigation Using Machine Learning

- Built an ML-based security solution to detect privilege escalation attacks in real time with 90% accuracy.
- Documented tech specifications and collaborated on problem-solving with peers for efficient deployment.

Full-Stack Web Platform Development

- Developed a responsive web app with React, Django REST, MongoDB, integrating AWS S3 and Lambda
- Delivered customer-centric solutions by collaborating with product and business teams.
- Technologies: React, Django, Python, LangChain, LLMs, DRF, MongoDB, AWS, Docker, Transformers, Jenkins, Redis.

AI-Powered Voice Interview Platform

- Developed AI-powered interview platform with real-time question generation, evaluation, and feedback, enhancing UX.
- Authored technical documentation and ensured unit-tested enhancements for reliability.
- Technologies: React, Django, Python, LangChain, DRF, MongoDB, AWS, Pytest, Selenium.

Certifications

Crash Course on Python, *Google (2023)*

Data Structures & Algorithms in Python, *Udemy*

AWS Cloud Essentials, *Coursera (2024)*

Testing Tools / Selenium with Java and Python, *ExcelR*
